

* Scarification not required for Asphaltic Concrete Wearing Surface and Epoxy Polymer Concrete Overlay.

* 1/4" (min.) for Epoxy Polymer Concrete Overlay
1-3/4" (min.) for Latex Modified Concrete Wearing Surface
2-1/4" (min.) for Low Slump Concrete or Silica Fume Concrete Wearing Surface

HALF-SOLED AREA

* Scarification not required for Asphaltic Concrete Wearing Surface and Epoxy Polymer Concrete Overlay.

* 1/4" (min.) for Epoxy Polymer Concrete Overlay
1-3/4" (min.) for Latex Modified Concrete Wearing Surface
2-1/4" (min.) for Low Slump Concrete or Silica Fume Concrete Wearing Surface

FULL DEPTH REPAIR

* Scarification not required for Asphaltic Concrete Wearing Surface and Epoxy Polymer Concrete Overlay.

* 1/4" (min.) for Epoxy Polymer Concrete Overlay
1-3/4" (min.) for Latex Modified Concrete Wearing Surface
2-1/4" (min.) for Low Slump Concrete or Silica Fume Concrete Wearing Surface

FULL DEPTH REPAIR IN HALF-SOLED AREA

DECK REPAIR DETAILS

* Width of joint seal to be no less than the depth and no more than twice the depth of the joint seal.

SECTION THRU JOINT (LATEX, LOW SLUMP OR SILICA FUME CONCRETE WEARING SURFACE)

SECTION THRU JOINT (ASPHALTIC CONCRETE WEARING SURFACE)

SECTION THRU JOINT (EPOXY POLYMER CONCRETE OVERLAY)

* Width of joint seal to be no less than the depth and no more than twice the depth of the joint seal.

SECTION THRU JOINT (LATEX, LOW SLUMP OR SILICA FUME CONCRETE WEARING SURFACE)

SECTION THRU JOINT (ASPHALTIC CONCRETE WEARING SURFACE)

SECTION THRU JOINT (EPOXY POLYMER CONCRETE OVERLAY)
